

Using the BMLC2GUI to make a C2SIM order

1. start the GUI and make sure it is configured for the server
2. select (from upper left) File->Open Order->C2SIM Orders
3. navigate from there to MiniEx Orders
4. open folder corresponding to your simulation
5. open template order for the unit you want to task
(if there is not a template, copy another and edit it to new unit UUID)
6. click on ManeuverWarfareTask
7. use dropdowns to select DesiredEffect and TaskName
8. enter Start Time (for MiniEx this is elapsed time after simulation starts)
9. click on Coordinates and edit Lat/Lon OR
 - a. click on "GET COORDS FROM MAP"
 - b. choose location by clicking on the map
 - c. click on MOVE COORDS TO XML to insert lat/lon into first task of order
10. use File to either SaveJAXFront or Push the order
